

JASKIRANPREET KAUR JASSAL

Graduate Cybersecurity Analyst | SOC | IT Support | GRC

Birmingham, United Kingdom | +44 7438 906552 | jkaurj22@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL PROFILE

Cybersecurity graduate from Aston University with practical experience across secure software development, IT support, data accuracy, client operations and technical documentation. Built Nexora AI, a Flask-based business assistant chatbot for meeting scheduling, voice input and process-aware event logging, using Python, SQLAlchemy, SQLite, the Web Speech API, CSRF protection, rate limiting and authenticated user accounts. Organised problem solver with strong communication, stakeholder management, workload prioritisation and technical reporting skills. Seeking graduate or entry-level roles across cybersecurity analysis, SOC, IT support, junior systems administration or GRC.

CORE SKILLS

Cybersecurity and GRC: Security governance, risk management, access control, secure configuration, incident documentation, confidentiality, integrity, availability, data protection and compliance awareness.

SOC and technical analysis: Log review, event logging, troubleshooting, root-cause analysis, validation testing, process traceability, threat awareness and structured evidence handling.

Programming and web: Python, Flask, SQLAlchemy, SQLite/SQL, JavaScript, HTML, CSS, C, PHP and GitHub.

Systems and tools: Linux fundamentals, Microsoft 365, advanced Excel, database management, VS Code, Jira and Confluence.

Professional strengths: Problem solving, analytical thinking, time management, workload prioritisation, stakeholder management, project coordination, teamwork, leadership, adaptability, accountability, ethical judgement and attention to detail.

KEY GRADUATE PROJECT

Nexora AI - ASR and Process-Aware Meeting Scheduling Chatbot | Final Year Project | 2025 - 2026

Repository: github.com/jaskiranpreetjassal/nexora-ai

- Designed and developed a proof-of-concept business assistant chatbot to schedule, reschedule, cancel and view meetings through text and voice input.
- Built the application using Python, Flask, SQLAlchemy and SQLite, with a structured front end using HTML, CSS and JavaScript.
- Implemented rule-based intent detection, slot filling for missing meeting details, conflict checking and alternative time suggestions.
- Added secure application features including user authentication, password hashing, CSRF protection, rate limiting and access-controlled routes.
- Stored user messages, meeting records and event logs to support process traceability and create a foundation for process mining analysis.
- Integrated ASR through the Web Speech API and evaluated the prototype with six participants, documenting strengths, limitations and future improvements around accents, background noise and scalability.
- Produced project documentation covering requirements, design, implementation, testing, evaluation, ethics, security considerations and reflective analysis.

EDUCATION

BSc Cybersecurity | Aston University | Sep 2021 - Jun 2026 | Birmingham, UK

- Completed final year; predicted 2:1 pending final classification.
- Relevant study: Secure Programming, Network Security, Digital Forensics, Security Governance and Risk, Cyber Crime and Law, System Management, Ethical Hacking and Web Development.
- Activities: Active member of the Computer Science Club and Italian Society.

A-Levels | St Thomas More Catholic School | Sep 2019 - Jun 2021

- Business Studies, Applied Law, IT and Italian.

GCSEs | Wood Green Academy | Oct 2016 - Jun 2019

- Including English Language and Literature, Maths, Double Science, ICT, French, Italian, Punjabi and Psychology.

PROFESSIONAL EXPERIENCE

Accounts Client Administrator | iForce, Culina Group Ltd | Mar 2025 - Sep 2025

- Managed client account data and logistics records with strong attention to accuracy, confidentiality, workload prioritisation and process traceability.
- Investigated operational and data discrepancies using Excel checks, database validation, structured problem solving and clear communication with internal teams.
- Coordinated with warehouses, inspectors, logistics teams and clients, demonstrating stakeholder management, teamwork and professional client service standards.
- Supported system access queries, escalated technical issues where needed and helped maintain smooth operational continuity.

General Administrator | Green Home Plans Ltd | Oct 2024 - Feb 2025

- Scheduled and tracked property survey operations using structured data systems, demonstrating organisation, time management and accurate record keeping.
- Maintained organised Excel trackers and documentation controls to support accountability, data accuracy and internal compliance checks.
- Handled client information professionally while supporting communication between customers, surveyors and internal teams, balancing deadlines, confidentiality and service quality.

Data Entry and IT Support | Wiggle | Mar 2022 - Apr 2023

- Provided first-line troubleshooting across hardware, software and system access issues, helping reduce operational disruption.
- Supported secure account access, patching procedures and data-handling practices to protect confidentiality and system reliability.
- Documented IT incidents and recurring issues, applying root-cause analysis, clear reporting and continuous improvement to reduce future risk.
- Maintained accurate datasets and records while working in a fast-paced operational environment.

ADDITIONAL EXPERIENCE

Language Teacher | GNG Punjabi School | Sep 2021 - Present; Interpreter | Word360 | Mar 2024 - Feb 2025; Submissions Officer | Energy Saving Group Ltd | Apr 2023 - Dec 2023; NCS Mentor | NCS | Aug 2019; Volunteer Assistant | Manor Hospital | Jul 2018.

Transferable strengths developed across additional roles: leadership, mentoring, public speaking, cultural awareness, professionalism and responsibility.
